I Company Overview

ADH Engineering & Construction Limited is an indigenous company providing Engineering, Procurement and Construction services, Facilities management and provision of Project Management Services in the Oil and Gas Industry in Nigeria.

The company also provides architectural consultancy services in areas of planning and designs, construction supervision, and project management. The company brings together individuals with varying experiences from within the country and international work environment. Our industry and professional background provides us an extensive network in target operational areas and strong relationships with individuals/companies in the various services that we offer.

The Company provides high quality Integrated Services in Engineering, Architecture and Planning, Procurement, Construction, Facility Management and Project Management Services based on the health and safety requirements in the oil and gas industry.

The founding Directors of ADH have proven combined track work records and life experiences of over 75 years in engineering, construction, procurement, facilities management, and provision of project personnel, in the Power, Oil and Gas and Architectural projects. In addition, the company has very experienced industry personnel dedicated to projects as required.

Company Overview

A complement of this wealth of experience positions the company technically with a competitive edge over our competitors.

ADH goal is to grow and strengthen our capabilities in these sectors by continue attracting quality personnel in the industry in order to retain the trust of our stakeholders. Additionally, our local content policy exceeds the expectations of the project host communities where we operate.

We believe in early community engagements with our hosts to ensure seamless transition to project execution. This provides the needed confidence of our technical partners in ensuring that they are able to work with us in deploying technology without hindrance from the local communities.

Incorporated 19th day of April, 2018

Provides Engineering, Procurement and Construction Services, for offshore and onshore Oil & Gas projects, Petrochemical, LNG, Refineries, Power and Government Agencies. Also provides Facility Management Services and Project management personnel.

Company Registration No RC: 1488047

Organogram

Areas of Operation

ADH Engineering and Construction Ltd. Provides engineering, procurement and construction support services, facilities management, and project management services in the following industry sectors.

Oil and Gas support services
•Onshore •Offshore

Petrochemical

Architectural & Planning

Refineries

Power Generation

LNG

Some of our support services include:

- Pipeline and Facilities Maintenance Services
- Technical and non-Technical Manpower Supply
- Specialized Professional Training and Development
- JIT Equipment and Tools supply

■ Our Proposal For The Upstream Sector

ADH is positioned and resourced to render the following services in the Upstream Energy Sector:

- **Studies & Advisory**
 - Cost and efficiency control studies
 - Facility optimization and debottlenecking studies
 - Technical advisory on projects and critical services
 - Benchmarking studies and evaluation
- **Project Management & Maintenance**
 - Turnkey facility operation & maintenance
 - Major turn-around planning and execution
 - Facility upgrade projects
 - Minor to medium EPIC projects in both onshore and offshore environments

■ Our Proposal for the Construction Industry

- Architectural Design, Build and Supervision
- Facilities Management
- Project Management & Maintenance
- Urban Renewal Projects
- Community Needs Assessment

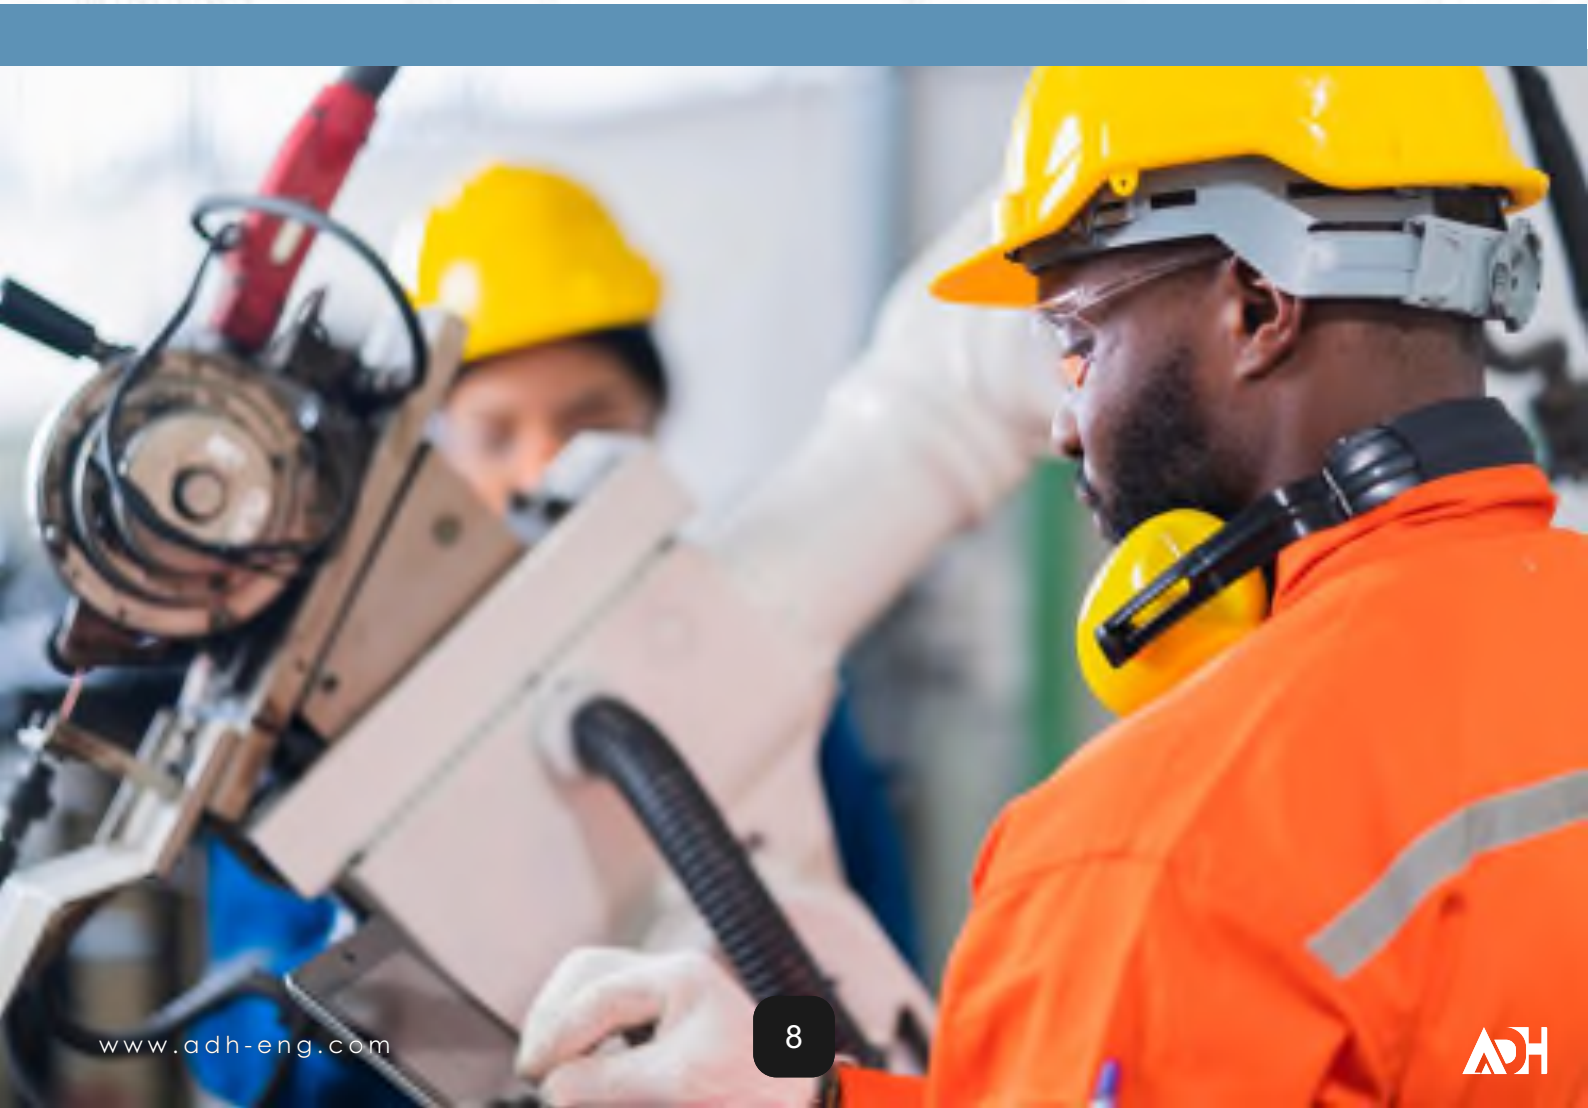

■ Quality Assurance/Quality Control

ADH Engineering and Construction Ltd. provides services which conform to recognized international standards. We take seriously issues of health, safety and environmental concerns while performing our work. Our quality management system is based on ISO 9001 which is focused on meeting customer expectations and delivering customer satisfaction.

Our quality assurance system guarantees the performance of services under quality control and audits while detecting non-compliances and achieving corrective actions to mitigate issues.

Our philosophy is therefore based on Do-it-Right 1st Time and continual improvement of engineering processes because we recognize time and energy are essential to profitability.

ADH Man Power Services

Recruitment and Placement:

ADH identifies, attracts, and recruits suitable candidates for various job positions based on the specific needs of client companies.

Temporary Staffing:

ADH offers temporary and short-term staffing solutions to meet the fluctuating needs of client organizations, such as covering employee vacations or handling temporary workload spikes.

Permanent Staffing:

ADH assists in hiring full-time employees for our clients, helping with the entire recruitment process, from sourcing candidates to conducting interviews and facilitating the hiring process.

Contract Staffing:

ADH provides contract or project-based staffing solutions, allowing clients to access specialized skills for a defined period.

Skills Assessment:

ADH assesses the skills and qualifications of candidates, ensuring they meet the requirements of client companies.

Background Checks and References:

ADH conducts background checks and verifies references for candidates, helping clients make informed hiring decisions.

Talent Pool Management:

ADH maintains a database of qualified candidates, enabling us to quickly match clients with appropriate candidates as job opportunities arise.

Payroll and Benefits Administration:

ADH handles payroll processing and administers employee benefits for temporary or contract workers, reducing the administrative burden on client companies.

Client Support and Relationship Management:

ADH offers ongoing support and maintains strong relationships with client companies to ensure that their staffing needs are consistently met.

Enzyme Enhanced Oil Recovery (E-EOR)

BiogrADH-Biodegradable Protein Enzyme

BiogrADH Technology

For Oil Field Production

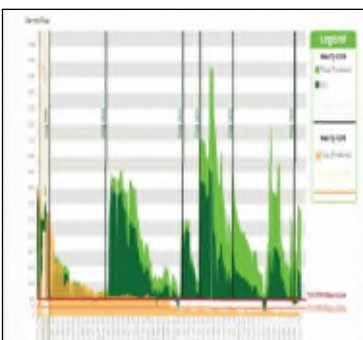

Biodegradable, oil soluble, water soluble, non-hazardous protein enzyme for oil recovery.

	<p>IT'S A CATALYST</p>	<p>Away from the old; Welcome the New!-Enzyme Enhanced Oil Recovery (E-EOR)</p>	<p>For Mature Oil Fields</p>
	<p>WHERE TO USE IT?</p>	<p>Any Type Of Hydrocarbon Oil/Any Type Of Solid Surface</p>	<p>This Catalyst cannot be consumed; it penetrates and releases oil from sandy surfaces in oil reservoirs</p>
	<p>HOW IT WORKS</p>	<p>Reduces interfacial tension IFT, changes wettability of sandy surfaces, reduces contact angles between oil and solid surfaces, reduces "positive-skins" by unclogging formation blockages.</p>	<p>Works to increase relative permeability in formation and restores formation pressure for easier total fluid flow in any reservoir.</p>

BiogrADH benefits

- Increase in total oil production
- Reduced lifting cost
- Simple pumping and no special equipment or experience are needed
- It is a catalyst that works continuously over time
- Non-toxic, biodegradable and environmentally friendly
- Works together with other IOR/EOR treatment chemicals
- It works in any Reservoir environment to improve current oil recovery
- ultimate recovery factor, and oil well production life
- A double win-win solution for any oilfield!

BiogrADH Case Studies - Venezuela

- Significant production increase
- Achieved 100% to 400% oil production increase.
- Production increase sustained for over a year.

■ Partnership/ Re-presentation

A Higher Perspective! technological innovations in oil and gas industry pumps and lifting solutions.

Technological & Environmentally-friendly Innovations to Meet the World's Growing Energy Needs for pumps and lifting solution in oil and gas industry.

ADH Engineering and Construction LTD is in partnership with JIL Global Inc Houston, Texas USA.

JIL Global Inc. Specializes in:

- Rigging Training
- DNV Certification
- Inspection & Repair
- Solid Weight Proof Load Testing
- Fabrication Services
- Technical Services
- Pumps
- Valves
- Lifting and Rigging Solutions
- Subsea Umbilicals Risers and Flowlines (SURF)
- Self Elevating Workover Platform (SEWOP)
